Pattern Christmas Juletræ

A simple pattern for a more experienced crocheter. But if you can do the basics... it is a fun small project to start with.

Tip!

The garland is also nice in colors gold or silver. And who is telling you the tree must be green? Try a red or pink tree and see how it looks.

Tree (green tree)

Start with color green. Braun will be at the end. Keep safety eyes also ready.

Go further with pattern.

CROCHET TIPS !

The amigurumi figures are crochet in on going spiral. If crochet in rows I will mention it in the pattern.

The colors yarn I used are just a hint. You always can use other colors. That is why I stopped telling which brand yarn I use. Except when I want to have a special effect.

I always use 100% cotton yarn or acryl when it must be fluffy.

I am a Dutch designer off amigurumi and since 2012 active on social media. I crochet since 2003 and learned it myself by YouTube. Soon I fall in love with the Japanese amigurumi. In Dutch there were not many patterns, so I tried to design them myself.

In 2012 I started my own blog and in 2018 this moved to: www.dutchamigurumi.wordpress.com

My patterns are all Dutch. Some of them are in English and in German. Most are free download on my blog or Ravelry. I also publicize in a magazine. These patterns are for sale of they will be released as free pattern after a year.
